

KRISHNA KUMAR BANDOJU

Full Stack Developer (.NET / Angular / Azure)

Hyderabad, Telangana | +91-7731976124 | krishnaleo.b@gmail.com

PROFESSIONAL SUMMARY

Full Stack .NET Developer with 7+ years of experience across the complete web application lifecycle — UI development, REST API/microservices design, database integration, and CI/CD pipeline engineering for enterprise platforms, including Microsoft Dynamics 365. Strong hands-on expertise in C#, .NET Core/.NET 8, ASP.NET Core Web API, Entity Framework Core, LINQ, and MS SQL Server on the backend, paired with Angular, HTML5, CSS3, and TypeScript on the frontend. Skilled in Azure cloud services (App Services, Azure SQL, Storage, Azure AD), CI/CD pipeline engineering with GitHub Actions and Azure DevOps, AI-assisted development using GitHub Copilot, and Agile/Scrum delivery. Some hands-on exposure to GenAI/Agentic AI concepts, including connecting LLMs with skills/plugins to build automation agents. Basic exposure to CQRS pattern, MediatR, gRPC, Azure Service Bus, Cosmos DB, and SignalR.

TECHNICAL SKILLS

- Backend: C#, .NET 8, .NET Core, ASP.NET Core, ASP.NET MVC, Web API, REST APIs, Microservices Architecture, Dependency Injection, Middleware
- Frontend: Angular, TypeScript, JavaScript, HTML5, CSS3, Responsive Design, Form Validation
- Database: MS SQL Server, Database-First Approach, Stored Procedures, Indexing, Query Optimization
- Data Access: Entity Framework Core, LINQ
- Architecture & Patterns: Microservices, RESTful Services, SOLID Principles, Design Patterns, API Versioning
- Cloud: Microsoft Azure (App Services, Azure SQL, Storage, Azure AD)
- Containerization & Orchestration: Docker
- Design: High-Level Design (HLD), Low-Level Design (LLD)
- AI/GenAI: Basic exposure to Generative AI (GenAI) and Agentic AI — connecting LLMs with skills/plugins to build automation agents
- CI/CD & DevOps: Azure DevOps, GitHub Actions (workflow authoring, YAML pipelines, branch protection & PR validation gates), CI/CD pipeline design, Git branching/merging strategies, TFS
- AI-Assisted Development: GitHub Copilot (code generation, workflow authoring, code review acceleration)
- Testing: xUnit, BDD Framework (Reqnroll), Unit Testing, End-to-End Automation Testing
- Logging & Security: Serilog, JWT Authentication, Azure AD, Role-Based Authorization
- Methodology & PM Tools: Agile/Scrum, Azure DevOps Boards, JIRA
- Concepts: OOP, SOLID Principles, Design Patterns, API Versioning, Exception Handling
- Basic Exposure: CQRS Pattern, MediatR, gRPC, Azure Service Bus, Cosmos DB, SignalR

PROFESSIONAL EXPERIENCE

Senior .NET Developer | Tata Consultancy Services (TCS) — Client: Microsoft, Hyderabad *Sep 2024 – Present*

ACD – Dynamics 365 Omnichannel

- Develop and enhance backend services and integrations for Microsoft's Dynamics 365 Omnichannel (ACD) platform across multiple GEOs, building and maintaining code in C#, .NET / .NET Core, and ASP.NET Core Web API, along with Angular frontend components and SQL Server-backed data layers.
- Analyze and fix critical defects and severity-based ICM incidents, delivering code changes and coordinating deployments across global environments.
- Support BDD framework migration efforts, refactoring automated test suites to align with platform upgrades.
- Build and maintain CI/CD pipelines using GitHub Actions and Azure DevOps, leveraging GitHub Copilot to accelerate workflow authoring and code reviews.
- Configure and enforce branch protection rules and pull request validation gates using structured Git branching/merging strategies to safeguard code quality before merge.
- Collaborate with global engineering teams in an Agile/Scrum setup to plan and execute deployment rollouts across multiple GEOs.

- Explored GenAI/Agentic AI concepts by connecting LLMs with custom skills and plugins to build automation agents (e.g., an Atlas Agent, Self-Heal Agent, and Task Agent) for bug detection, fixes, and PR verification.
- Used Azure integrations to orchestrate agent workflows, and implemented a markdown-based context file (copilot.md) to persist memory/state across agent runs.

Software Engineer | Shell Info Technologies, Hyderabad

Mar 2024 – Aug 2024

HR Benefits Management System

- Supported the HR Benefits module enabling employees to view, select, and manage benefit plans.
- Updated and maintained NuGet package dependencies across the codebase to keep the application secure and current.
- Monitored and handled S360 production alerts, ensuring timely acknowledgement and resolution of application issues.

Senior Software Engineer | AmpleLogic / VSS Software Services Pvt Ltd, Hyderabad

Sep 2019 – Feb 2024

LowCode v3.0 | *Oct 2020 – Feb 2024*

- Built full stack features end-to-end: designed RESTful APIs with API Versioning using ASP.NET Core on the backend and delivered corresponding Angular UI components on the frontend, within a Microservices Architecture.
- Implemented Dependency Injection, Middleware, JWT / Azure AD Authentication, Serilog logging, and centralized Exception Handling.
- Configured Azure CI/CD pipelines and integrated the BDD automation framework into the release process.

ATWORK | *Mar 2022 – Mar 2023*

- Developed a full stack employee management system using ASP.NET MVC and Angular, backed by SQL Server for data persistence.
- Implemented reporting modules, LINQ-based data retrieval, application logging, and performance optimization.

e-LMS (Enterprise Learning Management System) | *Sep 2019 – Sep 2020*

- Developed an enterprise Learning Management System with configurable approval workflows, covering both backend logic and frontend UI.
- Built frontend validations, database design, and report generation using ASP.NET MVC and SQL Server.

CERTIFICATIONS

- Claude Platform 101 — Anthropic Academy

EDUCATION

B.Tech in Electronics and Communication Engineering

JNTUH (Jawaharlal Nehru Technological University Hyderabad)
